SUMMARY.

PALATIAL PITT-STREET,
MAGNIFICENT MARKET-STREET,
EIGHTH WONDER OF THE WORLD,
FARMER'S GRAND DISPLAY.

Every schoolboy knows, although perhaps some of an older folk have forgotten, the seven WONDERS OF THE WORLD—

The pyramids first which in Egypt were laid, Next Babylon's Garden for Aresia men said; Then the Hanging Gardens of Babylon, Fourth the Temple of Diana in Ephesus built; The Colossus of Rhodes in bronze to stand, Fifth the Judgment-seat of Zeus in Greece; Sixth the Tomb of Mausolus, last wonder of old;

Or Palace of Xerxes with canals to feed it.

The chairman of the Labour party has issued a statement embodying the settled policy of the party.

He says that if another election must occur it will be taken as soon as possible.

Radicals interpret the statement of the chairman of the Labour party as a declaration of war on the Government.

Mr. T. P. O'Connor states that there will be no crisis if the Government is able to declare that the Vote of No Confidence will become law.

It is reported that some extreme Radicals are prepared to offer an amendment to the Address in Reply.

The second division of the Home Fleet has been ordered to engage in a tactical cruise of the coast of Spain.

The Colonial Institute will entertain Sir George, High Commissioner for Australia, at a banquet on March 15.

The Emperor Francis Joseph has signed the constitution of Bosnia-Herzegovina.

It is stated that the tariff agreement between Canada and Germany presages the Dominion's diplomatic independence.

Sir William Ramsay maintains that the position in South Africa, Mafeking, and M. S. is commercially valuable.

Colonel-General Baden-Powell is asking the colonial government authorities to offer facilities for the emigration of boy scouts.

The Ruir of Bohemia has formally opened his first mosque in St. Petersburg.

The Spanish Cabinet has decided to pardon most political offenders, including those convicted in the previous trials.

A Russian emigrant, a Polish noble, his wife, and six children, and then sold the house.

There is "rubber boom" on the London Stock Exchange. The public is investing heavily.

Many new companies have been formed to exploit rubber lands, and some stock jobbers have made profits.

The Scotch firm, which was massacred in the Western Sudan, was ambushed in a ravine.

The 4 per cent debenture issue of the Orkney Company, amounting to £250,000 at 4%, has been covered.

Mr. S. Brewster, who became senior warden, has been awarded the Sir Isaac Pitman scholarship at Cambridge.

The Corporation of London has decided to make in the Guildhall on Empire Day the children of the city elementary schools.

The review of the Congo State continues to be derived mainly from forced labour.

Last October's scheme for the defence of Africa contemplated an expenditure of £100,000 per annum.

Emphasis is laid on the inadequacy of the present forces, organisation, training, and qualities of war.

The Field Marshal lays his finger on the ear of population as a serious practical difficulty.

The existing railways are declared to be more favourable to an enemy than to the defences.

Last October estimates the land forces equated to 80,000 fighting men, efficiently armed and equipped.

Half this force is to be the larger cities and defended ports from attack, the other half operating as a mobile striking force.

The northern mineral judges have decided to sit on Monday on the question of mining work.

The proprietors maintain their stand, that mill the work at work, they will refuse to give up to confer.

All the southern collieries, with the exception of Clifton, are now in active work.

Some of the mines are turning out over 1900 tons a day.

Great difficulty was experienced at some of the collieries in getting the horses into the mines.

In some instances the animals showed a strong disinclination to leave the sunshine for the darkness of the pit.

An agreement has been arrived at between the coal-lumpers and the stevedores.

The strike of the coal-lumpers is ended, and the men will be back to work this morning.

The miners will be back to work this morning.

The various sections of Daffodils are included in these collections.

ANDERSON AND CO.—FOR BULBS,
309 GEORGE-STREET, SYDNEY.

SEARL'S REMINISCES.

JANUARY QUARTERLY.

THE CHURCHES.

THIRTY YEARS OF GOLF.

The "Quarterly" has an interesting budget of golfing reminiscences from Horace G. Hutchinson. It was Mr. William Little, a four-year-old, who first introduced the passion of putting little balls into little holes with instruments singularly ill-adapted to the purpose. At that time golf had not come to its own. Now it has quite literally changed the face of England, for scores of new watering-places owe their very existence to it. Thirty years ago every rustic grained tees were golf clubs; now there is no room to be without them. Much later than the golfers regarded the golfer with gentle pity, though the game was introduced into England, so it is said, by James I. The Royal Blackheath Golf Club has high antiquity, the old Mansfield club was founded in 1818, that at Calverley in 1821, and Bowdon in 1842. Upwards of 40 Societies exist in England, all derived their jubilee, but the English boom only began with the founding of the North British club in 1864. Several clubs were started about this time, and the movement increased rapidly after 1880. The writer is loud in his praise of the change all this has effected in the Rev. W. L. Carr-Smith is practically unanimous. Such vacancies are filled by the Archbishops, Bishops, and Prelates of the Church of England, who are the most prominent members of the diocese. The result is that the three Archbishops of Sydney, and Brisbane, the did not, and the fact the Acting Primate (Bishop Cambridge) has written to the three Archbishops asking them to pledge themselves to vote for the proposed changes. The result is that the Archbishops will, with or without the consent of their supporters, retire, leaving Archbishops to be returned to the unoccupied Archbishops' positions. The Archbishops will retire in favour of Archibishop Wright, provided all his supporters consent and are agreeable. But it seems reasonable that they would all agree. Or, thirdly, the Archbishops and Bishops are 19 of the 26 of the Ecclesiastical Ministers, and voting, as they are so far to pasture. It seems likely that if this plan were adopted, at the cost, certainly, of a good deal of trouble, we might have a better Church.

THE NATIONAL ARCHIVES.

An informative and readable article on the origin and history of the archives for State Papers will be found in the "Quarterly." The ancient palaces of the Kings of England were naturally the first repositories of records, which were placed along with regalia and closely connected with these ancient treasures. The great rooms of Westminster Abbey, of the Temple Chapel, and of the Rolls Chapel. It was only in 1822 that the 60 scattered Record Offices of London were made to yield up their contents to the new repository in the Rolls estate. Yet in spite of many centuries of formal care and attention, there was little more than a fortunate survival of an immense mass of material lost for ever. Our own losses are in the main due to the incredible carelessness of officials, more particularly in the eighteenth century. The writer gives a detailed account of the French archives, which have not reached a high degree of efficiency.

ANCIENT JERUSALEM.

fewer than ten recent works on the topography of ancient Jerusalem afford material for a "Quarterly" reviewer. Our earliest knowledge of the institutions of the Synod will be found in the "Quarterly."

Mr. F. C. Philip, B.A. (Sydney), has

been appointed tutor at

Magdalen College, in place of

Mr. H. H. Winkworth, recently

deceased.

The question whether the feeling of the Sydney Diocese is actually represented in its Synod was raised last week at a meeting of the council. Dr. D. B. P. Moore, in his address, said that the first of a series of addresses on "Some Problems of Biblical Criticism." He explained generally the foundation upon which the critics of the "higher criticism," or for the matter of that, all criticism, is based. It returned to the old country, and, having renounced his position as a priest of the Church of England, and received a dispensation in the Baptist Church, he said that what shall we say of the extreme "Plymouth Brethren" of Moore College, and the use of the name of the church? Is it the right of man to take such extreme measures? We see churches shut up all through the week and kept bolted and barred; the daily service is left unsung, and the sacraments are administered in a mangled form. For these things—these scandals—the Synod has no word of censure or reprobation. It is the right of man to be a pastor, and, as far as the ritual of the church is concerned, it is the right of man to be a pastor and priest, and who is active and zealous and capable—why not? The Synod, however, has been told that it is not the "High Churchman" who is blamed who is blamed in the diocese of Sydney. It is because he puts many of his brethren to shame by setting a higher standard, and, as far as the ritual of the church is concerned, it is the right of man to be a pastor and priest, and who is active and zealous and capable—why not?

News has just been received by cable that all the students of Moore College, who were members of the Synod, have withdrawn from the Society for the Study of theology of the University of Durham, have passed.

Mr. F. C. Philip, B.A. (Sydney), has

The reason why WADE'S CORN FLOUR is such a nourishing article of diet is that it is all food, and every grain of it is digestible. Moreover, for invalids it has the valuable property that, when the stomach cannot digest pure milk, a little Corn Flour, well boiled with the milk, greatly assists its digestion. Thus, even the weakest invalid can relish a Wade's Corn Flour Blanc Mange, or Gruel, and derive strength from every particle. After all is said and done, it is not the food we eat that counts, but the food we digest.

ALL of WADE'S CORN FLOUR is digestible, and that is why you will find it such a help in the nourishment of the young—aye, and of the old, too.

Try it in your own home, and test our words.

The reason why WADE'S CORN FLOUR is such a nourishing article of diet is that it is all food, and every grain of it is digestible. Moreover, for invalids it has the valuable property that, when the stomach cannot digest pure milk, a little Corn Flour, well boiled with the milk, greatly assists its digestion. Thus, even the weakest invalid can relish a Wade's Corn Flour Blanc Mange, or Gruel, and derive strength from every particle. After all is said and done, it is not the food we eat that counts, but the food we digest.

ALL of WADE'S CORN FLOUR is digestible, and that is why you will find it such a help in the nourishment of the young—aye, and of the old, too.

Try this Recipe for a Corn Flour Blanc Mange.

1/2 OZ. 1 TABLESPOONFUL FILLED LEVEL WITH TOP OF THE SPOON WADE'S CORN FLOUR.

2 PINTS (8 LBS.) LAUGH OR 4 SMALL BREAKFAST CUPS WADE'S CORN FLOUR.

Mix the Corn Flour to a smooth cream with a little of the milk. Heat the rest of the milk with the lemon rind to the boiling point at a ready, strained saucers. Remove the saucers from the fire, and add the Wade's Corn Flour slowly, stirring vigorously. Add the rest of the milk, and stir until the Wade's Corn Flour is completely dissolved. Pour into a 2-pint mould and cover. When cold, turn out and serve. To make a 1-pint shape, use half the above quantities.

You can get Wade's Corn Flour at any grocer's; and if you would like to know the many ways in which it can be served, cut out the Coupon printed here and send it with a penny stamp. By next mail you will receive a fine book of 46 recipes.

TO THE EDITOR OF THE HERALD.

Mr. Edwards, Bishop of Liverpool, has issued a letter, national, in which the attitude of Roman Catholics towards the Bible is explained and defended.

"You say that the Bible is the Word of God,

and prove it by quoting the New Testament.

Speaking at the Tamworth Church lately, the Rev. James Colwell said it had come to him with painful surprise that harvesting on Sunday was common in the district, and that his high officials were following this evil practice.

The question whether the feeling of the Sydney Diocese is actually represented in its Synod was raised last week at a meeting of the council. Dr. D. B. P. Moore, in his address, said that the first of a series of addresses on "Some Problems of Biblical Criticism." He explained generally the foundation upon which the critics of the "higher criticism," or for the matter of that, all criticism, is based. It returned to the old country, and, having renounced his position as a priest of the Church of England, and received a dispensation in the Baptist Church, he said that what shall we say of the extreme "Plymouth Brethren" of Moore College, and the use of the name of the church? Is it the right of man to be a pastor, and, as far as the ritual of the church is concerned, it is the right of man to be a pastor and priest, and who is active and zealous and capable—why not? TO THE EDITOR OF THE HERALD.

The complaints which Canon Sharp makes in this morning's paper, though they have been partially met, do not yet, so far as I am aware, satisfy him, a reply, probably because to most churchmen it seemed to require simple action to induce those whom I represent to make the changes which he desires.

TO THE EDITOR OF THE HERALD.

LAW REPORT.**THE HIGH COURT.**

(Before Mr. Justice O'Conor.)

MAINTENANCE OF WIFE.

The parties stated that they had agreed upon a statement of facts to be argued before the Full Court, and the matter was adjourned sine die.

SUPREME COURT OF NEW SOUTH WALES.**IN EQUITY.**

(Before Mr. Justice A. H. Simpson, Chief Judge, and Mr. Justice J. M. Rowan.)

KANGAROO MINES DISPUTE.

Vickery v. Taylor.

Mr. Koen, C. C., and Mr. Vaughan, instructed by Messrs. Sly and Russell, appeared for the plaintiff; Mr. D. L. Arnott, Mr. C. G. and Mr. Parker, instructed by Messrs. A. J. Taylor and Greenwell, for the defendants; Mr. E. Duckett and A. J. M. Ashburner, Mining Inspectors, and Mr. Rowan P. Hickson, for the Kangaroo Mine Liability; and Mr. Leverrier and Mr. Harvey, instructed by Mr. A. G. de L. Arnold, for the State of New South Wales.

In this matter the plaintiff asked for an inspection of the Kangaroo mine, and the defendants now desired to limit this to the ground surface, so that there was no equity against the mine to enable the plaintiff to obtain inspection.

Another application was made by Mr. Harvey, his decision. Another application that certain particulars be furnished stood over until after judgment on the matter relating to inspection.

JUDGMENT.

Fall & Blumenthal.

By consent this suit was dismissed, no order being made as to costs.

IN PROBATE.

(Before Mr. Justice Street.)

A CONTESTED WILL.

Clayton v. Clayton.

Mr. Gordon, T. Morgan, and Morgan, instructed by Messrs. Harold T. Morgan and Morgan, appeared for the plaintiff; George Augustus Clayton; and Mr. Innes, instructed by Mr. James Clayton, for the defendant.

In this suit plaintiff claimed to be the executor of the will of Mrs. Jane Clayton, late of Marsfield, deceased. He took the usual steps to obtain probate of her will, which was made on August 11, 1905, but when it was granted it was ordered by the defendant.

Plaintiff alleged that the testatrix was of sound and disposing mind and memory when her will was made, and there were no circumstances which would entitle him to grant it. Defendant, in his defence, denied that testatrix was of sound and disposing mind and memory, but charged that she did not know and approve of its contents.

The case stands part heard.

The following Probates and Letters of Administration have been granted during the week:- J. Eggers, H. T. Hunt, W. J. Carson, G. Church, S. Butt, P. J. Alderson, T. A. Johnson, J. Quigley, J. J. Quinn, C. Allbut, C. A. Green, G. Charman, A. Spence, A. H. Blingman, C. P. Hunter, C. G. Blackwell, A. A. Scott, F. E. Cheshire, J. F. L. Barnes, F. E. Lewis, J. Milne, M. J. Conroy, A. Stirling, E. Geddes, J. H. Jeffers, W. H. Smith, E. Godfrey, M. E. Jones, J. Hilltop, John D. McFerry, B. J. Kersey, W. J. Greenwell, (Probate of Codicil), E. Mahoney, B. E. Brown, R. McCabe, O. Pearce, F. H. Geisow, W. C. Goss, J. G. Hart, J. G. Hart, W. G. Porter, H. N. Baker, E. Stephens, W. H. Burgess, W. H. Spencer, C. F. Staiton, F. E. Herring, J. H. Barnes, H. J. Crispin, E. A. W. Allwood, A. C. Sulkin, T. G. Bedford, W. J. Dwyer, W. Nicholson, M. A. Match, W. J. Stern.

IN BANKRUPTCY.

(Before the Registrar, Mr. H. H. Salmonbury.)

HIRING CONTRACTOR PETITION.

The Sydney Glass and Lamp Company, Ltd., and George Hudson and Sons, Ltd., versus Henry Loney. Order made sequestering on the defendant, and Mr. C. F. V. Lloyd appointed trustee.

Peter Matheson versus Arthur Philip May, solicitor. Order made for sequestration of Peter Matheson, and Mr. W. H. Palmer appointed official assignee.

VOLUNTARY SUSPENSIONS.

Charles Andrew Harrison, of Parkes, late of Tichbourne, blacksmith. Mr. C. F. V. Lloyd appointed assignee.

QUARTER SESSIONS.

(Before Judge Murray and Justice.)

ACQUITTED.

Mr. C. A. White was Crown Prosecutor.

Henry Herbert Wrenther, a middle-aged son of a widow, not guilty to a charge that on September 20, at Sydney, he did assault a girl aged 11 years.

Mr. W. Abigail appeared for the defendant, who was found guilty of the offence, which was a wilful assault on a child under 14 years of age.

A verdict of not guilty was returned.

A FIRST OFFENDER.

Frederick Edgar Ross pleaded guilty to the larceny of a revolver, cartridges, and other goods, and was sentenced to six months' imprisonment.

Accused was given a sentence of six months and then released as a first offender on recognisances (two) of £25.

LAW NOTICES.**MORDAT, FEBRUARY 11.****SUPREME COURT.**

It's High Time You Tried WINCARNIS

The World's Greatest Restorative.

WINCARNIS IS AN IDEAL WINE TONIC—A COMBINATION OF CHOICE WINE, EXTRACT OF MEAT, AND EXTRACT OF MALT; ALL BLOOD-FORMERS OF HIGHEST VALUE AND MOST BENEFICIAL TO THE SYSTEM.

If your Health is not all it should be, if you are run down, depressed and debilitated, try Wincarnis now—at once. The supreme test of merit lies in the good Wincarnis will do you. It checks deterioration, supplies nourishment and strength immediately, bracing up the nerves, making new blood, creating new tissues and giving Health and Life to Brain and Body.

Startling Testimony.

Mrs. Scott, Chilton Foliot, Hungerford, March 30th, 1909, writes:—"I am nearly 80 years old, and have lived in France, Spain and Denmark. I have had 50 different doctors, and I have never met anything so good as Wincarnis. I have told endless people about it, and many regard it in the light that I do. I am never without it in the house, and take a wineglassful every day between 11 and 12. When very ill I take a glassful during the night also, but that is seldom. I have given it to several poor people, who all have much benefited by it, and I gave a glassful to a poor woman whom THE DOCTOR SAID WAS DYING—but it revived her, and all say Mrs. Scott SAVED HER LIFE."

With grateful thanks, yours, S. A. Scott."

Thousands have written like this—is it any wonder that Wincarnis is recognised and recommended by over 8,000 Medical Men?

Test Wincarnis to-day; what it has done for others it will do for you.

Wincarnis can be obtained from any Wise Merchant, Licensed Chemist or Grocer.

BUILDING MATERIALS.

WUNDERLICH STEEL CEILINGS ARE NOT PRESSED.

There are several ways of doing steel ceilings. But only ONE right way.

And that is the Wunderlich way.

Nearly all steel work of this character is produced by means of slowly moving crank presses, and the design is pressed into the metal.

Wunderlich Art Metal Work is rendered by means of repeated blows of the hammer, giving a perfect finish and a striking relief effect impossible to the other process.

Besides, Wunderlich designs are unbreakable.

**ARNOTT'S
MILK ARROWROOT BISCUITS.**

INSTRUCTIONS HOW TO GIVE THE BISCUITS.

FOR VERY YOUNG CHILDREN.—Crush the biscuits in a powder, and, if possible, get them a very soft shape. Take a well-heated demitasse-pot of the powder, and gradually add half a cupful of boiling water, stirring at the same time. Then add half a cupful of cold milk, and sweeten to taste. This will make a nice drink for the child. If the child is old enough, give him a cup of the mixture, and tell him to drink it all down at once. If he does not like it, add a pot of water, and boil for half an hour.

FOR OLDER CHILDREN.—Pour the mixture over the cap or basin in which the biscuits are stored to soak, until they swell out, leaving no water. Later on children can have their dinner while seated at home or at school.

F. WOLFF & SOHN, KARLSRUHE & LONDON.

KALODERMA JELLY, prepared with glycerine and honey, without oil or fat; does not grease; is most agreeable, and delicious for preventing and alaying irritation.

KALODERMA SOAP, prepared with glycerine and honey, a most refined and delicately perfumed Toilet Soap, for bathing soap for softening and improving the skin.

KALODERMA RICE POWDER, most popular and refined Toilet Powder.

KALODERMA SHAVING SOAP, prepared with the renowned Kaloderma Jelly, undeniably the most excellent shaving soap on the market. A refined luxury of a popular price.

OBSTINATE FROM ALL THE LEADING ESTABLISHMENTS.

THE QUESTION OF THE DAY.

The question of today, of tomorrow, and of every succeeding day is—
HAVE YOU USED PEARS SOAP? If you have not, you have not done your duty by your skin and complexion, and on the other hand—let it be on both hands, and on the face, too, that you do it—yes, you can feel happy for you will have done the best that can be done for the skin's health and beauty. There can be no question about that.

PEARS has been making beautiful complexion for nearly 100 years.

PEARS.

MATCHLESS FOR THE COMPLEXION.

PLAIN TRUTHS

on the subject of Health are the only acceptable pronouncements. Disengaged statements and conclusions are not worth the paper they are written on, and often rise to double that. But we may safely listen to universal opinion. The public have for long known the value of Beecham's Pill in cases of disorder and irregularity of the Stomach, Bowels, Liver, and Kidneys. These medicines are now freely obtainable from the leading chemists of Australia. The use of Beecham's Pill will promote the healthy action of these organs, and that all the good things have on every hand.

ABOUT

These medicines are true in the strictest sense. Most people desire a specific that can be depended upon at all times to correct the vital functions when they are out of order, and that is why Beecham's Pill is so popular. It is a safe, reliable, and effective medicine. It will put you right and keep you up to the mark. They have proved an immense benefit to many thousands of men and women all over the world. It is just as certain that they will benefit you and this is a plain truth you may accept and act upon in regard to.

BEECHAM'S PILLS.

Find everywhere in炮房. Price, 10/- (No. 1), 1/- (No. 2), and 2/- (No. 3).

CONGO DAMPCOURSE.

A RAMPART AGAINST DAMPNESS.

Congo Dampcourse gives perfect underground protection on foundations and cellar floors against dampness and vermin in the soil. This material is especially useful in the case of new buildings, and in the prevention of the growth of ordinary surface vermin. Dampcourses cannot grow in the soil, and the inner walls and floors thus protected will be dry. The action of the material is to absorb moisture from the air, and thus prevents damage by ants and other underground vermin. Lime in mortar will not decompose it. Made in seven convenient widths.

CONGO ROOFING (5-ply grade) comes ready to lay without special labor, and can be trusted to give perfect protection for upwards of 10 years. Sample free on request.

SNAKE-BITE.

WHAT TO DO WHEN BITTEN.

(BY JAMES S. BRAY.)

The frequency of press records of cases of snake-bite during the last two or three weeks is to be accounted for by the fact that we have just entered upon the most dangerous time of the year in connection with encounters of our venomous snake-life. All of the reptiles that deal out death to mankind in Australia—that is to say, the females—are in a very savage mood, and will continue so to be until towards the end of the coming month of March.

They are highly with young, and will not readily get out of one's way, and show fight in a most vicious spirit.

Inquiries have been made as to the best means to adopt in case of snake-bite, and as I have devoted so many of my life to the subject, I may be excused in writing with pardonable pride the following preliminary marks:

I had an interview with Lady Jersey, relative to some subject pertaining to natural history, and in the course of conversation I mentioned to her my inventions in connection with pure venom from reptiles for medical scientific purposes, as well as that of using the dissected venom of a snake to test the dead plant life, that additional sense of security Nature has, for similar reasons, bestowed also upon the galah, the top-knot pugno, the quarrion, the little hawk, the wood swallow, that which gives to the prevailing bluish grey—the "blue eyes" that additional sense of security Nature has, for similar reasons, bestowed also upon the plains.

Of course the vegetation of the locality is responsible for all this. Not only does the prevailing colour dominate the dead plant life, but suffuses it in its greatest luxuriance, and when, perhaps, it would be expected to be in its most verdant growth. The grey of the salt-bushes and salt and perfume-scented grasses along the lines of the great roadsides, the bright and more ornamental markings on the prevailing bluish grey, but this latter shade may be said to form the dominant hue.

The imported rabbit, even, under the influence of generation after generation of tenures of the plains, is gradually evolving for itself in its fury to local surroundings.

Even in wet seasons, when one would expect the swampy parts to be a mass of vegetation, the same greyish-green colouring is observed, even in the most luxuriant growths of the scrub, the grasses, the mounds, the banks, the principal growth in such situations.

The seeds of this plant were used as food by the explorers, Burke and Wills, attempted in vain to sustain themselves on their fatal trip to the south.

"Nardo seeds" are a favorite food with the natives, who eat them raw, and the drier the seed, the more delicious it is.

The drier the seed, the more delicious it is.

be settled. The resolution put before them provided that all employees who were formerly employed at the mines should be taken on again. On that point they were emphatic. They said that if the proprietors did what might happen if the proprietors adhered to the position they had taken up.

The lodges decided to take the ballot on Monday.

SOUTHERN MINERS.

INTERIM AWARD.

DEFICIENCY PLACES.

The chairman of the Southern Collieries' Board (Mr. W. Edmunds) declared that the miners' award report was the subjects of dispute between the coal-miners and the mine-owners, after the board meeting yesterday.

2. In wages, the manager or the manager-over-under-manager cannot agree with the miner working it as to the compensation to be paid, the manager shall have the option of sending the child to another place, or the miner to another place, or of working it with the miner at his average earnings for the previous 12 months; but if the miner has not been working the recognised district minimum wage, such place shall be considered a deficient place.

3. In wages, the manager or the manager-over-under-manager cannot agree with the miner working it as to the compensation to be paid, the manager shall have the option of sending the child to another place, or the miner to another place, or of working it with the miner at his average earnings for the previous 12 months; but if the miner has not been working the recognised district minimum wage, such place shall be considered a deficient place.

4. Should any disputes arise under the general clauses as referred to he referred to a board consisting of three representatives of the Southern Colliery Proprietors' Association and two representatives of the Southern Colliers' Employees' Association, to be known as the Southern Collieries Conciliation Board, and, failing their agreement, such dispute would be referred to the Southern Collieries' Miners' Board for determination.

This award shall be binding on all persons engaged in the industries of coal-mining and all other industries, including those in the Southern Collieries' Workers' (not miners') Board, except officials, deputies, and works-engineers.

MARLBOROUGH (Friday).—The leader of the Federal Opposition (Mr. Fisher) has addressed enthusiastic meetings at Burnside, Mount St. Mary's, and Dicidott.

QUEENSLAND.

PINEAPPLES AND ARROWROOT.

BRISBANE. Friday.—Mr. Frank Green, an agricultural and horticultural expert, estimated the annual pack of Queensland pineapples at 35,000 cases, being four cases less than the Australian market share. The total crop, at best, may be one-fourth the quantity of the annual pack. The coming crop of Queensland arrowroot is estimated at about 60 tons short of Australia's production. It is sold by small manufacturing confectioners given its price an advantage over St. Vincent arrowroot.

VICTORIAN RAILWAY SMASH.

INQUEST ON VICTIMS.

MELBOURNE. Friday.—The inquest on the victims of the Beaumaris railway smash was continued at Ballarat today.

James Knowles, train examiner at Stawell, said that he went along the train headed by engine No. 41, and found the tape turned on. He said: "I turned it off again." Mr. Edward Cawdron replied: "Did we? We have a broken train pipe in the first engine, and there are no pipes to fix it up at Ararat." Witness: "I am not satisfied with what you say. If it had been fixed it was not his fault. Had any other party done what the fusion party did?" Cawdron: "I think the man who would have the fusion, had it been able to have at once gone to the electors. (Applause.) The tape is now off, however, so far as I can see, good light train, but I'll look after it, all right." Witness considered dangerous in that a pipe might burst, but Cawdron: "It was not so great an emergency that it could have been stopped. There was no great urgency for the train to go on."

George Conroy, district rolling stock inspector, inspected the engines after the accident, and said: "Examined the goods train

at Stawell, found the engine had been stopped. To cut and fit a new pipe would

take an hour or two. The goods train would be stopped, rolling stock in

spectator," said: "Examined the goods train after the accident. I found it a good average well-braked train, and thought there was no danger in stopping coming down the Beaumaris bank."

The Court adjourned till 10 o'clock on Saturday morning.

M.R. HUGHES ON MR. DEAKIN.

SCATHING CRITICISM OF THE FUSION.

Speaking last night at North Sydney in support of the Federal Labour candidate (Mr. E. T. Tighe), Mr. Hughes, M.P., referred to Mr. Deakin and his address of the previous evening.

He said that Mr. Deakin had commenced by saying that his (Mr. Hughes') expulsion from office had rankled in his bosom. "But what about Deakin?" he asked. "In the last year, Federal Parliament had existed. Mr. Deakin had held office all the time, with the exception of the short periods when the administration was in the hands of Mr. Watson, Mr. Reid, and Mr. Fisher. And directly Mr. Deakin was out of office he was decently or indecently received. (Laughter.)"

Mr. Deakin to his credit, however, had told the Chamber of Commerce last night apologetically, "I do not believe that before the public water committee in favour of the Umpherombe water scheme. The chamber is strongly opposed to any court scheme."

GRAFTON. Friday.—An annual meeting of the Presbyterian Church was held on Thursday. The balance sheet showed a total fund receipts for the year to be £2,638, half-year school fees £132, and Sunday-school fund £31.

Alderman Thomas Hall, one of the members of the council, who resigned his seat in the council as a protest against the alleged mismanagement of the city's affairs by the Labour party, which has a majority in the corporation, said: "I am not the only person who has left the city, in also resigning."

The Chamber of Commerce last night appointed a representative committee to appear before the Public Works Committee in favour of the Umpherombe water scheme. The chamber is strongly opposed to any court scheme.

GRAPTON. Friday.—A meeting of the Grafton branch of the National Union of Miners and Miners' Workers, to elect officers, was held on Saturday evening, the following officers were elected:

President, Mr. R. D. Rawden; vice-president, Mr. T. J. Rawden; secretary, Mr. J. J. O'Connor; Mr. D. Lobban, and auditor Mr. A. Thompson.

LIMOREE. Friday.—At a special meeting of the Municipal Council to-night, the decision last week for a general rate of 2½d was rescinded. The rate is now fixed at 2 1/10d, with a lighting rate of 2d. This is a result of the recent criticism of the council for having made a general rate increase of 2d, without consulting the public.

John Perry, Minister of Mines, presented a memorial to the corporation, asking that the lighting rate be reduced.

Mr. Deakin, who pointed out certain regulations which had been introduced on behalf of the various mining associations, was given a hearty ovation.

WEST MAITLAND. Friday.—Mrs. Mary Jane Heydon, of Mount Pleasant, Farley, died in a private hospital at Campbell Hill, aged 87 years. Her husband retired to the country, and had resided in this district ever since. She left three sons and one daughter.

Mr. Deakin claimed the authorship of a naval defence scheme for the Commonwealth. But when Mr. Deakin said "we" must not be led into thinking that he always meant "we" he was referring to himself.

Deakin held office, he had 14 supporters, and was hopelessly in a minority that he could not be elected. Half of the Labour members of the 14 now had joined the Labour party, so the "we" of 14 got 11 elected to the House of Representatives. The Labour party, assisted by 14 Deakinites, yet Mr. Deakin's party is opposed to the scheme.

In taking credit for initiating the naval policy, Mr. Deakin misrepresented facts.

The Premier, in his speech, embodied compulsory training, the only difference being that Mr. Deakin's scheme stopped short of that proposed by the Labour party, in attempting to make the men useful if ever called to the colours.

Mr. Deakin stated that the Labour party was opposed to it. That was not true; what the party opposed was putting it in the Commonwealth.

Another effort was carried that Mr. Peter Watson, the member for Phillipines and Williamson, that the mine should be re-opened.

The only course that could be adopted now was to suspend the lodge from the association.

Thomas Cane, manager of the North Bulli pit, submitted his evidence respecting conditions at North Bulli.

SOUTHERN COLLIERIES' BOARD.

COLDEALE FULLY MANNED.

CLIFTON STILL OUT.

HORSES DRAGGED IN BY FORCE.

At Coldeale, this morning, the men, who were occupying themselves at the colliery, were given a start, the management having sufficient labour to carry on the work of the colliery, and the men were sent back to the old employers—through their action in not starting with the other district collieries on Monday last, and until the mines further opened up those in the cold will be compelled to look for employment elsewhere.

Since the stoppage at South Clifton colliery five months back, neither side has been able to agree on wages, and after a series of meetings, neither side, siding with the union nor the two men, Williamson and Phillips, it is now reported that action is to be taken tomorrow next by sounding the wharf.

All the collieries, with the exception of South Clifton, have now agreed on wages, and the mines, turning over 1,000 tons per day.

Great difficulty was experienced at some of the collieries in getting the men in, and the men were sent back to the old employers.

After the loyal toast, Q.M.S. Howards proposed: "The Day we Ceasefire, and the men, Mr. Peter Watson proposed: "Absent Comrades, and Mr. J. C. Gates: "The Visitors." The health of the officers was proposed, and the responses were made.

Captain Samuelson, Dick, and Waller, presented the evening musical programme, which was a success.

At the end of the strike, Captain Coulter, Mr. Howarth, Mr. Gates, and Captain Coulter.

TRADES AND LABOUR.

DEPUTATION TO PREMIER.

KURRI KURRI. Friday.—At a mass meeting of miners yesterday, a motion was carried that the miners should be allowed to return to work, and the miners' demands accepted.

Another motion was carried that Mr. Peter Watson, the member for Phillipines and Williamson, be asked to resign his seat.

Another proposal was carried that a ballot would be taken as to whether work would be resumed on Wednesday. The men evinced little interest.

SECOND CONTINGENT REUNION.

At the School of Arts last evening the members of the N.S.W. Second Contingent Army Medical Corps held a dinner to celebrate the tenth anniversary of the formation of the corps.

Mr. A. Wilson proposed a general vote of thanks to the corps.

All the officers present, and the men, were present.

After the loyal toast, Q.M.S. Howards proposed: "The Day we Ceasefire, and the men, Mr. Peter Watson proposed: "Absent Comrades, and Mr. J. C. Gates: "The Visitors." The health of the officers was proposed, and the responses were made.

Captain Samuelson, Dick, and Waller, presented the evening musical programme, which was a success.

At the end of the strike, Captain Coulter, Mr. Howarth, Mr. Gates, and Captain Coulter.

RAILWAY AND TRAMWAY EMPLOYEES.

NEW UNION FORMED.

A largely-attended meeting of wood and coal labourers was held on Thursday in the Trades Hall, C. J. Conington being the chairman.

Mr. J. G. Conington, Mr. H. Verster, O. Raaph, and E. Keyser, the new union rep., and the Industrial Disputes' Rep., were present.

Mr. G. J. Conington, Mr. H. Verster, O. Raaph, and E. Keyser, the new union rep., and the Industrial Disputes' Rep., were present.
